AMERICAN WAR. the latest issue of that paper received from

IMPOSSIBILITY OF RESTORING THE UNION. Were England at this moment to announce to the world its intention to make the speedlest to make the same declaration as to England, the world would laugh at the egregious folly that had openized the design and promoted the boast. The world would grant that, supposing gither people to be infatuated enough, and beingte enough, it could inflict enormous and irreparable injuries on the other, but only at the value of the miserable result. Now, that

proceed a step further, It is necessary to ob serve that the case of the Hornbern Americans have to protect more than a thousand miles of land frontier, including one closely belong ucred position surroun led by fors or ill affec ed adberents. Speaking the same language as their foe, they have no means of excluding sples from their lines, or even traiters from their ranks. They have to make a standing army and a fleet. They have to learn the first elements of tactics, and even military disriplins. Toey are we bout soldiers, or officers to com-mend and to train them. Their revenue, at its best, before the war, was only just sufficient to meet the interest of the debt. Nucly 1, be incurred by two years of the war on its present scale. That revenue, however is, to begin with, maissed by the loss of the seceders and by the stoppage of traffic, so that it is quesonable whether it will be possible to do more than repair that loss by the new laxes now

American credit is not so good as British, nor is the credit of a Federal Union in process of dissolution likely to be equal to that of a always failed against cortified positions: against breast-works thrown up in a night; against forests full of invisible for; against ing away, for short of the list on paper, beaten with beat, hunger, thirst, and a long murch, and sucreised on both flanks by the sudden outpourings of railways. While this has occurred to Vitzinia, almost within sight of Washington, a column of 8,0 0 Federalists, advancing against a for thrice their number, has met with the same fate, no doubt for much the same ressons, at Springfield, four or five hundred miles to the west-as if in order to warn the Northern States that what has happened is no accelent, no result of peculitr cir cumstanc a or personal failure, but by incvita-

There is but one enterprise which can be compared to his, and that is the Pirst Napo lean's glyantie, but infatuated, attempt upon That was a case of a great political alliance, as grand as a Federal Union, com-prising the best, the wealthical, and the most excuent of Europe, advancing into a territory, the sparse and poor population of which scarcely sorpassed that of the invading host. Winter might be the immediate cause, but it was also the apology of the fremendous compare the means of the Pederalists with these of Napoleon, he will find them far inferior in every respect; while there is no doubt that he Southern States are far more able to d-fend every point, every position, every line in their territory, then the Russiacs were in there. They have mountainous ranges instead of suppose they have a population accustomed to carry arms, and only too glad to use them; they have railways, and abundance of food and other necessaries of war. They are evideat y superior in generalship, and in the so clel organization best adapted for war.

The result is that thus far they have shown they can dispute every inch, and keep the invaler always under the apprehension of being either outflanked or driven back upon his own Against all this it can only be said that the Northern States have the prepondarance in white men, in money and in credit. These, and ed, would be important considera- lines. ions if the Southern States were loveding the They would be important if this were the ordisary case of two countries at war with one another. But it is not. The northerners are account of a visit of the President and Cabinet engaged in the reduction of the southerners. They are acting on the offensive against a foe to the Federal encampments across the Powhich, on its own land, is content to act on the tomag:

infensive, excepting only that should the op- The President, Secretary Cameron, Gov. pertunity occur, it would advance its line of defense to include the capital. Experience shows toll under ordinary circumstances a comparative small population, with little money and means of war, is sufficient for a very good defense.

We are in a condition to effer advice. We were first and some of artillery from Griffin's United States bate of America, as the inventor; but that gunpowder was two o'clock r. m. They were received near the Union fortifications by Gen. McClellan and Arabs, is cortain. Ancient writers speak of a people living near the Ganzes that attacked their enemies "with thunderbolts allot from their walls;" and "with morms of lightnings and the Northern States of America, as

The distinguished party then proceeded a

hands with Gen. McClellan, and the General.

Are they? Is not this an overwhelmingly superior, and to have them know him, gratified them, and the liveliest of scenes were enacted. The state of themselves? Can they drive the southerners like a flock of sheep, smeke them out of the role in heart like wasps, ferrest them like rabbils, and heg them like game?

Let them just look forward a little, and consider the probabils state of things next year, and the year after, and twenty years house. Each man had something cheering to say to the General. One man said, "General to the mill, and in drying, forms cakes called mill cakes. These are then broken up between grooved wooden rollers, of 120 pounds to the square hydraulic press, of 120 pounds to the square anxious to wipe out built know, he can my does not run," was the prompt response.

The compound is then put into the mill, fity pounds at a time, which is made of two revolving casing iron rollers of three tons weight, revolving on a cast-iron plate, and ground three hours. It is kept moistened all the time with weter, to prevent its forming dust. It is then him likes. It is then him in the probability of the mill, and in drying, forms cakes called mill cakes. These are then broken up to the square hydraulic press, of 120 pounds to the square foot. The mixture comes out of this pressure in flat sheets half an inch thick. It is then broken up and sitted. It is then broken up and sitted. It is then broken up and sitted it is then part and the expenses of a private. He talked little, howen it to forming dust. It is then him in flat sheets half an inch thick. It is then broken up and sitted. It is then broken up and sitted it is then part and the expenses of a private. He talked little, howen it to forming dust. It is then him in flat sheets half an inch thick. It is then broken up and in the with well at the time, which is made of two revolving on a cast-iron plate, and ground three hours. It is kept moistened all the time with the mile, here tons weight, revolving on

At last Captain Larker, of the Chicago at a time, and that on no other footing will peace ever be made, it will be much better that it should come to pass after one year's war than the or twenty. It is not as if the Union or two Unions were the only alternative. As the war proceeds, no man can toil what new powers and combinations may arise, and particularly how far the Western States will andure the taxes and financial obligations necessary for the war. The addice we offer is only what the Americans have given to all the world. It is a highly of their own cotton—a pipe of their own limits of their own cotton—a pipe of their own limits of the index of their own cotton—a pipe of their own limits of the index of their own cotton—a pipe of their own limits of the index of their own cotton—a pipe of their own limits of the index of their own limits of the index of their own cotton—a pipe of their own limits of the index of their own cotton—a pipe of their own limits of the index of their own limits of the Chicago at a time, and revolved forty times a minute. By this operation the edges of the grains and the loose particles on them are taken off by friction.
